

Registration questions

03/10/2026 5:05 pm PDT

PLUS ☒ *One registration question is available on all plans. Multiple questions, multiple choice, and private responses require Plus or higher. [Learn more here.](#)*

When members sign up for an event, the host can set one or more questions to collect information about the attendee. Questions are collected during registration, and members can edit their responses from the event details screen. Admins can export responses to a spreadsheet at any time.

Event hosts are asking questions that help them plan and engage their members:

- "Do you have any dietary restrictions?"
- "What's your T-shirt size?"
- "What's your 1-mile pace?"
- "What's your dog's name?"

Question types

Each question can be free text or multiple choice. Use multiple choice when you want structured, countable answers.

Private responses

Mark a question private and only hosts and leaders with event management permissions can see the responses. Members can view their own private response from the event details screen.

Pricing

The Free plan allows 1 registration question and supports free text question types, but it does not include private responses. The Plus plan allows unlimited registration questions, supports both free text and multiple choice question types, and includes private responses.
