

Shopify integration

05/19/2025 4:16 pm PDT

PRO ⓘ *Shopify integration collection requires a Heylo Pro subscription. [Learn more here.](#)*

Heylo can integrate with [Shopify](#) to make the buying experience seamless for members and painless for admins. For example, Heylo can pass your paid member information automatically to your Shopify store, or your sponsor, and instantaneously offer discounts to paid members. If a member cancels, Heylo will automatically remove the discount.

[Learn how to set up the integration in 60 seconds](#)

With Heylo's Shopify integration, member emails are automatically synced with your Shopify store. If a contact already exists, it's updated—no duplicates. Members can be auto-tagged based on paid membership in Heylo as well if you'd like, making it easy to verify eligibility for store discounts and benefits.

If a member cancels, their tag is removed to reflect their updated status, but their contact information remains in Shopify for your records.

No more copying and pasting from CSV exports... Heylo alleviates the admin work and enables members to get timely access to all the benefits associated with joining the group.

Please complete [this form](#) to set up your integration.
